

Democracy in Countries and the Covid-19 Pandemic

By Will Hanvey, Mia Padberg and Daniel Xu

Problem Statement

Research Question: Did democracies fare better or worse during the covid-19 pandemic?

Background

Universal Declaration of Human Rights: “the will of the people shall be the basis of the authority of government”

- Democracy provides an environment that respects human rights and fundamental freedoms

Ideological debate between democratic states and authoritarian regimes

- Great power conflict

Relevance today

THE WALL STREET JOURNAL.

IDEAS

Democracies Are Better at Fighting Outbreaks

China's harsh response to the coronavirus has influential admirers, but Western nations recognize that public health fundamentally depends on public trust.

Data

- The World Democracy Index from 2020
- “Our World in Data” Covid-19 data set

	Overall score	Rank	I Electoral process and pluralism	II Functioning of government	III Political participation	IV Political culture	V Civil liberties
Full democracy							
Norway	9.81	1	10.00	9.64	10.00	10.00	9.41
Iceland	9.37	2	10.00	8.57	8.89	10.00	9.41
Sweden	9.26	3	9.58	9.29	8.33	10.00	9.12
New Zealand	9.25	4	10.00	8.93	8.89	8.75	9.71
Canada	9.24	5	9.58	8.93	8.89	9.38	9.41
Finland	9.20	6	10.00	8.93	8.89	8.75	9.41
Denmark	9.15	7	10.00	8.93	8.33	9.38	9.12
Ireland	9.05	8	10.00	7.86	8.33	9.38	9.71
Australia	8.96	9=	10.00	8.57	7.78	8.75	9.71
Netherlands	8.96	9=	9.58	9.29	8.33	8.75	8.82
Taiwan	8.94	11	10.00	9.64	7.22	8.13	9.71
Switzerland	8.83	12	9.58	8.57	7.78	9.38	8.82
Luxembourg	8.68	13	10.00	8.57	6.67	8.75	9.41
Germany	8.67	14	9.58	8.21	8.33	8.13	9.12
Uruguay	8.61	15	10.00	8.57	6.67	8.13	9.71
United Kingdom	8.54	16	10.00	7.50	8.89	7.50	8.82
Chile	8.28	17	9.58	8.21	6.67	8.13	8.82
Austria	8.16	18=	9.58	7.50	8.33	6.88	8.53
Costa Rica	8.16	18=	9.58	6.79	7.22	7.50	9.71
Mauritius	8.14	20	9.17	7.86	6.11	8.75	8.82
Japan	8.13	21	8.75	8.57	6.67	8.13	8.53
Spain	8.12	22	9.58	7.14	7.22	8.13	8.53
South Korea	8.01	23	9.17	8.21	7.22	7.50	7.94
Flawed democracy							
France	7.99	24	9.58	7.50	7.78	6.88	8.24
United States of America	7.92	25	9.17	6.79	8.89	6.25	8.53
Portugal	7.90	26	9.58	7.50	6.11	7.50	8.82
Estonia	7.84	27=	9.58	7.86	6.67	6.88	8.24
Israel	7.84	27=	9.17	7.50	9.44	7.50	5.59
Italy	7.74	29	9.58	6.43	7.22	7.50	7.94
Malta	7.68	30	9.17	6.79	6.11	8.13	8.24
Czech Republic	7.67	31	9.58	6.07	6.67	7.50	8.53
Cabo Verde	7.65	32	9.17	7.00	6.67	6.88	8.53
Botswana	7.62	33	9.17	6.79	6.11	7.50	8.53
Cyprus	7.56	34	9.17	5.36	7.22	7.50	8.53
Slovenia	7.54	35	9.58	6.43	7.22	6.25	8.24
Belgium	7.51	36	9.58	7.86	5.00	6.88	8.24

Methods

```
def plot_covid_vs_democracy(covid_df, covid_column, dem_df, dem_column):  
    # Create a scatterplot, mapping all countries and their respective points  
    # on a graph  
    merged_df = pd.merge(left=dem_df, right=covid_df, left_on='name', right_on='location')  
  
    nan_value = float("NaN")  
    if covid_column == "hosp_patients" or covid_column == "hosp_patients_per_million":  
        merged_df.replace(0.0, nan_value, inplace=True)  
        merged_df.dropna(subset = ["hosp_patients"], inplace=True)  
    if covid_column == "total_tests" or covid_column == "total_tests_per_thousand":  
        merged_df.replace(0.0, nan_value, inplace=True)  
        merged_df.dropna(subset = ["total_tests"], inplace=True)  
  
    plt.scatter(merged_df[dem_column], merged_df[covid_column], color = "orchid")
```

```
# Find m and b coefficients needed to create a best-fit line  
m, b = np.polyfit(merged_df[dem_column], merged_df[covid_column], 1)  
  
# Use m and b to create a best fit line  
plt.plot(merged_df[dem_column], (m * merged_df[dem_column]) + b,  
         color = "red", linewidth = 3)  
plt.title("Correlation between " + dem_column + " and " + covid_column)  
plt.xlabel(dem_column)  
plt.ylabel(covid_column)  
plt.show()  
  
# Prints out the correlation coefficient of the two variables  
correlation = np.corrcoef(merged_df[dem_column], merged_df[covid_column])  
print(correlation)
```

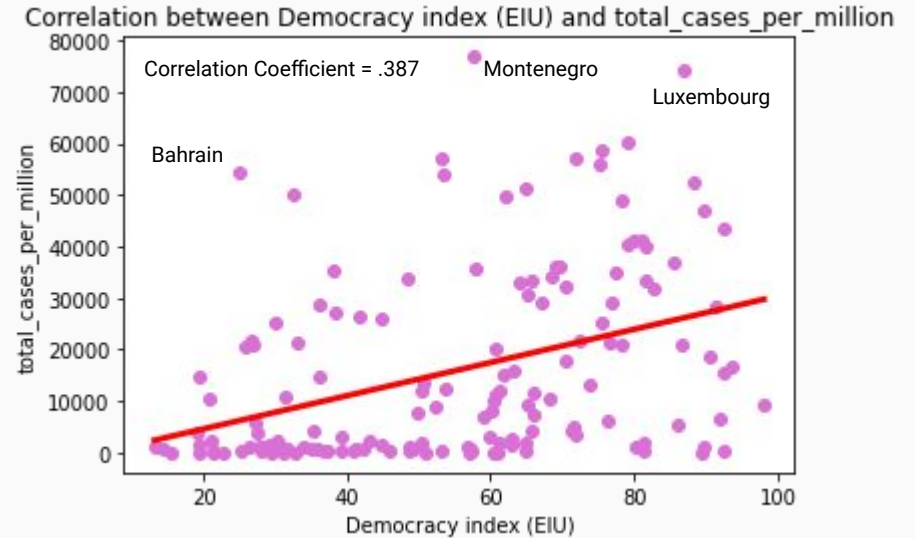

Does democraticness affect...

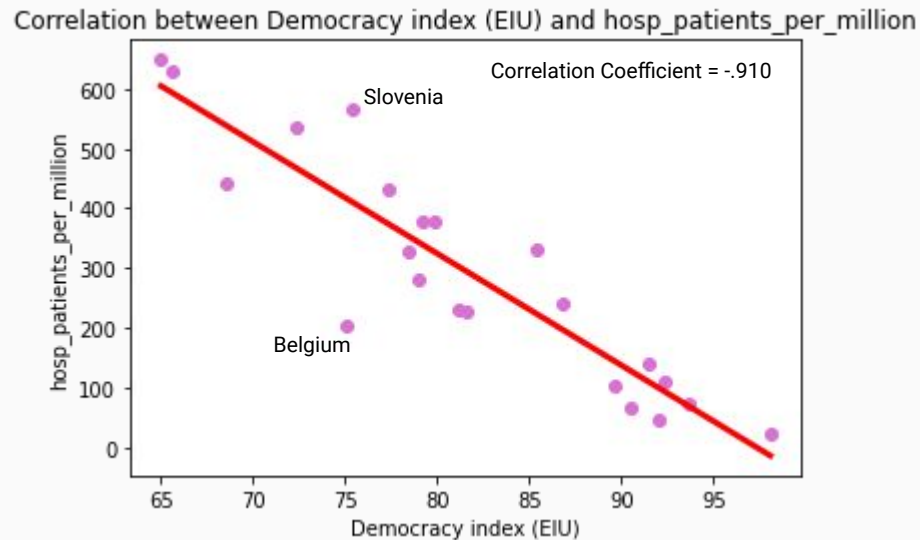

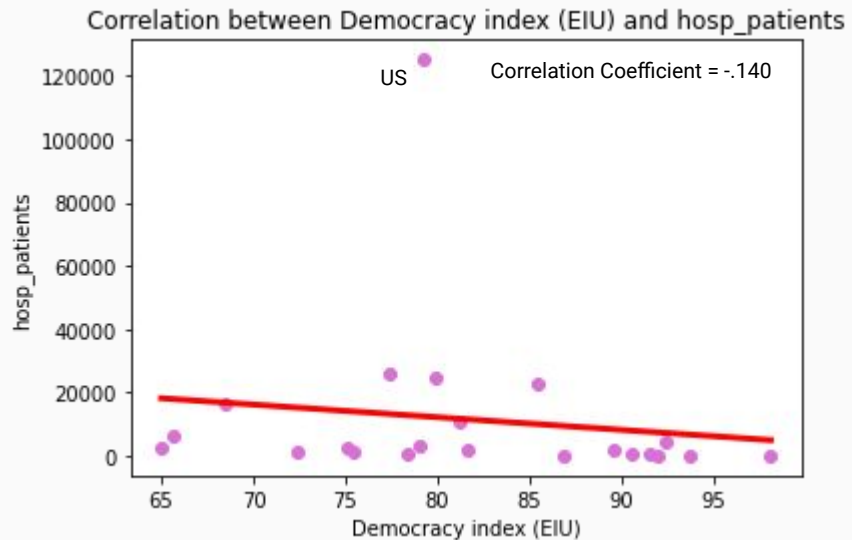

Tests

Cases

Hospitalizations

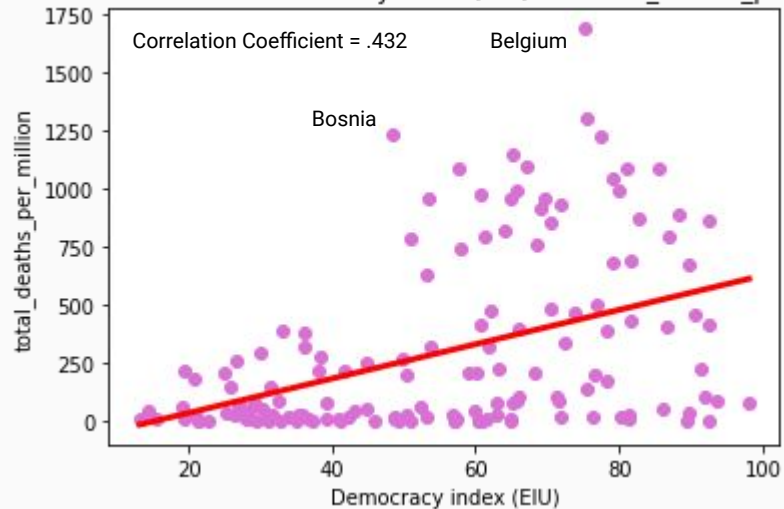

Deaths

Correlation between Democracy index (EIU) and total_deaths

Correlation between Democracy index (EIU) and total_deaths_per_million

Conclusions

- ❖ Bad data ---> Even worse correlations
 - Unreliable data sources
- ❖ Unable to make any claims about the correlation between a nation's democracy and the effectiveness of their Covid-19 response
 - Only likely correlation is between DIS and Hospitalized Patients per million
- ❖ Potential directions to expand further into:
 - Only include democracies/flawed democracies in our data
 - Include vaccinations into our research
 - Include prior outbreaks/pandemics
 - Are there better indicators/predictors for the spread of covid-19?

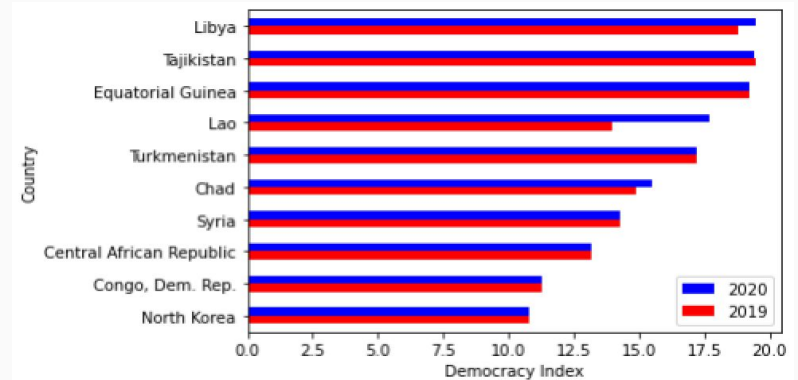

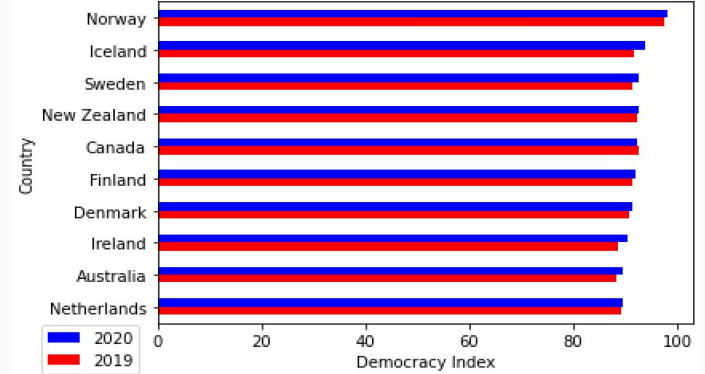

How can we use this knowledge to better prepare for future pandemics?
